Career Objective

Dynamic and results-driven RPA Developer with a passion for automating business processes to enhance efficiency and productivity. Seeking a challenging role where I can leverage my technical expertise in RPA tools such as UiPath to design and implement innovative automation solutions.

Skills

Programming Languages

Java | C

Web Technologies

HTML | CSS | Javascript

Tools

Uipath Studio
Visual Studio Code IDE
Eclipse IDE
Git Version Control

Soft Skills

Communication | Collaboration |
Adaptability | Leadership | Time
management | Adaptability |
Problem Solving | Attention to
detail

Certification

- RPA developer foundation
- RPA developer advanced

Experience

Senior Analyst

Nov 2021 - Jul 2023

HCL Technologies

- **Designed and Implemented Automation Solutions:** Spearheaded the development and implementation of end-to-end RPA solutions for critical business processes using UiPath. Successfully automated repetitive tasks, resulting in a 30% increase in operational efficiency and a 25% reduction in processing time.
- **Collaboration and Stakeholder Engagement:** Collaborated with cross-functional teams including business analysts and process owners to understand automation requirements. Conducted workshops to gather business process details and ensure seamless integration of automation into existing workflows. Fostered strong communication channels, resulting in increased stakeholder satisfaction.
- **Continuous Improvement:** Proactively identified opportunities for process improvement and optimization. Regularly reviewed existing automation workflows to ensure they align with evolving business needs and made necessary adjustments to enhance performance.
- ***Quality Assurance and Testing:** Implemented robust testing strategies to ensure the accuracy and reliability of automation scripts. Conducted unit testing, integration testing, and user acceptance testing to validate the functionality of RPA solutions.
- **Documentation and Training:** Created comprehensive documentation for all developed RPA solutions, including design specifications, process documentation, and user guides. Conducted training sessions for end-users to facilitate a smooth transition to automated processes.
